	required. The Chief of Procurement therefore inquired whether	
	he might be given space to put up and the necessary	
	housing. Subject to further discussion, it was agreed that	
	possibly the permanent solution for this problem should be to	
	have the facilities near a port of debarkation to cut down on	
	the number of re-shipments, but to meet the immediate problem,	
25X1A	it was agreed that minimum facilities should be provided for	
20/(1/(an interim solution of the problem as these facilities	05.74
	would later be useful for and equipment used	25X1

	5. The construction of the camps was approved as stated	
	in the submitted project, to be done by a private contractor	
	for an estimated \$275,000.00. In view of the many aspects of	
	construction which might be unforeseen or are not yet fully	
	explored, a contingency of \$10,000.00 was suggested and approved.

	6. Mr then asked whether this site had been decided	
	upon because it was known to have been available or as a result	
	of elimination of other possibilities. It was pointed out that	
	a wide survey of areas reasonably close to Washington had been	
	made. Either they would require an outright purchase or construction	on
	of all facilities or were not suitable from the point of view of	V4.5

	and has at least some of the housing and construction	
	in place; therefore far cheaper than any other site and is	
	satisfactory from the transportation point of view.	
	7. Mr. then noted his understanding that this was an	
	isolated area with no recreation facilities, and he suggested	
	there would be a serious personnel problem in persuading employees	
	to remain for long periods of time, particularly in the time of	
	manpower shortages when competition from private industry is keen.	
	The Chairman agreed that this might be a critical factor, particular	
	as the employees will have to be cleared. Mr suggested the	²⁵ X1A
	possibility of asking the draft authorities to draft those not	
	physically fit for normal active duty to be assigned to Service	
	companies from which CIA could draw for such problems as were faced	
	in this project. It is understood that the Personnel Director was	
	negotiating on this theory prior to presentation of this project	
	and that there is reason to believe that the personnel will be	
	composed of draftees. The Personnel Director has just informed	
	me that discussions were proceeding, but there are many technical	
	points which will have to be covered. The Chairman felt that this

personnel problem was of sufficient importance to make satisfactory solution a condition precedent to final approval of the project. The Committee then summed up and agreed that the allotment of \$700,000.00 for the Fiscal Year 1951 would not be exorbitant.

8. The Chief of the Training Division pointed out that his requirements from the covert offices were by no means in final form and he fully expected to be required to activate more camps by the summer of 1951. It was therefore suggested that he should be prepared to submit more detailed plans for such expansion in the near future.

LAWRENCE R. HOUSTON Recorder, PRC
